SUBJECT TEACHER NAME: MRS. PRIYA BADARIA

INSTRUCTIONS: Students are required to do this assignment on A4 size paper.

ASSIGNMENT

CHAPTER 1: NAME OF CHAPTER: Symmetry

Content 1: Line of Symmetry in 2D Shapes:

- Draw a square, a rectangle, and a circle on coloured paper, cut and paste it.
- Question: How many lines of symmetry can you draw for each shape? Which shapes have the most and why do you think this happens?

Content 2: Rotational Symmetry:

- Question: Pick a common household object, like a clock or a fan, write names of 5 such objects. Can you find out how many times you can rotate the object within a full circle and still have it look the same? What is the order of rotational symmetry of your chosen object?

Content 3: Symmetry in Nature:

- Question: Go outside and observe natural objects like leaves, flowers, or animals. Can you identify symmetry in any of these objects? Draw one example and explain the symmetry you observed.

CHAPTER 2: NAME OF CHAPTER: Visualising Solid Shapes

Content 1: Understanding 3D Shapes:

- Observe objects around your home or neighborhood (such as a box, ball, water bottle, etc.).
- Question: What 3D shape does this object represent? How can you identify its shape (e.g., cuboid, sphere, cylinder)?

Content 2: Faces, Edges, and Vertices:

- Take any two 3D objects from your surroundings, such as a book (cuboid) and a ball (sphere).
- Question: Can you count and record the number of faces, edges, and vertices of both objects?
- Why do some shapes (like the sphere) not have edges and vertices? Comment your opinion.

Content 3: Drawing 3D Shapes:

- Question: Try to draw the 2D representation of a cube and a pyramid (triangular). What are the differences in the way they look on paper versus real life?

NOTE: This assignment is the part of 'Subject Enrichment activity' for Term- II.
